1. COURSE OVERVIEW

The Craft Instructor Training Scheme is operational since inception of the Craftsmen Training Scheme. The first Craft Instructor Training Institute was established in 1948. Subsequently, 6 more institutes namely, Central Training Institute for Instructors (now called as National Skill Training Institute (NSTI)), NSTI at Ludhiana, Kanpur, Howrah, Mumbai, Chennai and Hyderabad were established in 1960 by DGT. Since then the CITS course is successfully running in all the NSTIs across India as well as in DGT affiliated institutes viz. Institutes for Training of Trainers (IToT). This is a competency based course for instructors of one year duration. "Mechanic Machine Tool Maintenance (MMTM)" CITS trade is applicable for Instructors of "Mechanic Machine Tool Maintenance (MMTM)" CTS Trade.

The main objective of Crafts Instructor training programme is to enable Instructors explore different aspects of the techniques in pedagogy and transferring of hands-on skills so as to develop a pool of skilled manpower for industries, also leading to their career growth & benefiting society at large. Thus promoting a holistic learning experience where trainee acquires specialized knowledge, skills & develops attitude towards learning & contributing in vocational training ecosystem.

This course also enables the instructors to develop instructional skills for mentoring the trainees, engaging all trainees in learning process and managing effective utilization of resources. It emphasizes on the importance of collaborative learning & innovative ways of doing things. All trainees will be able to understand and interpret the course content in right perspective, so that they are engaged in & empowered by their learning experiences and above all, ensure quality delivery.

2. TRAINING SYSTEM

2.1 GENERAL

CITS courses are delivered in National Skill Training Institutes (NSTIs) & DGT affiliated institutes viz., Institutes for Training of Trainers (IToT). For detailed guidelines regarding admission on CITS, instructions issued by DGT from time to time are to be observed. Further details available complete admission are made on NIMI web portal http://www.nimionlineadmission.in. The course is of one-year duration. It consists of Trade Technology (Professional skills and Professional knowledge), Training Methodology and Engineering Technology/ Soft skills. After successful completion of the training programme, the trainees appear in All India Trade Test for Craft Instructor. The successful trainee is awarded NCIC certificate by DGT.

2.2 COURSE STRUCTURE

Table below depicts the distribution of training hours across various course elements during a period of one year:

S No.	Course Element	Notional Training Hours		
1.	Trade Technology			
	Professional Skill (Trade Practical)	640		
	Professional Knowledge (Trade Theory)	240		
2.	Engineering Technology			
	Workshop Calculation & Science	80		
	Engineering Drawing	120		
3.	Training Methodology			
	TM Practical	320		
	TM Theory	200		
	Total	1600		

2.3 PROGRESSION PATHWAYS

- Can join as an Instructor in a vocational training Institute/ technical Institute.
- Can join as a supervisor in Industries.

2.4 ASSESSMENT & CERTIFICATION

The CITS trainee will be assessed for his/her Instructional skills, knowledge and attitude towards learning throughout the course span and also at the end of the training program.

- a) The Continuous Assessment (Internal) during the period of training will be done by Formative Assessment Method to test competency of instructor with respect to assessment criteria set against each learning outcomes. The training institute has to maintain an individual trainee portfolio in line with assessment guidelines. The marks of internal assessment will be as per the formative assessment template provided on www.bharatskills.gov.in.
- b) The Final Assessment will be in the form of Summative Assessment Method. The All India Trade Test for awarding National Craft Instructor Certificate will be conducted by DGT at the end of the year as per the guidelines of DGT. The learning outcome and assessment criteria will be the basis for setting question papers for final assessment. The external examiner during final examination will also check the individual trainee's profile as detailed in assessment guideline before giving marks for practical examination.

SI.				Internal	Full	Pass Marks	
No.	Subj	ect	Marks	assessment	Marks	Exam	Internal assessment
1.	Trade	Trade Theory	100	40	140	40	24
2.	Technology	Trade Practical	200	60	260	120	36
3.	Engineering	Workshop Cal. & Sc.	50	25	75	20	15
4.	. Technology	Engineering Drawing	50	25	75	20	15
5.	Training	TM Practical	200	30	230	120	18
6.	Methodology	TM Theory	100	20	120	40	12
Total Marks		700	200	900	360	120	

2.4.1 PASS CRITERIA

The minimum pass percent for Trade Practical, TM practical Examinations and Formative assessment is 60% & for all other subjects is 40%. There will be no Grace marks.

2.4.2 ASSESSMENT GUIDELINE

Appropriate arrangements should be made to ensure that there will be no artificial barriers to assessment. The nature of special needs should be taken into account while

undertaking the assessment. While assessing, the major factors to be considered are approaches to generate solutions to specific problems by involving standard/non-standard practices.

Due consideration should also be given while assessing for teamwork, avoidance/reduction of scrap/wastage and disposal of scrap/waste as per procedure, behavioral attitude, sensitivity to the environment and regularity in training. The sensitivity towards OSHE and self-learning attitude are to be considered while assessing competency.

Assessment will be evidence based comprising of the following:

- Demonstration of Instructional Skills (Lesson Plan, Demonstration Plan)
- Record book/daily diary
- Assessment Sheet
- Progress chart
- Video Recording
- Attendance and punctuality
- Viva-voce
- Practical work done/Models
- Assignments
- Project work

Evidences and records of internal (Formative) assessments are to be preserved until forthcoming yearly examination for audit and verification by examining body. The following marking pattern to be adopted while assessing:

Performance Level	Evidence			
(a) Weightage in the range of 60%-75% to For performance in this grade, the candidate should be well versed with instructional design, implement learning programme and assess learners which demonstrates attainment of an <i>acceptable standard</i> of crafts				
instructorship with <i>occasional</i> guidance and engage students by demonstrating good attributes of a trainer.	 the training on specific topic. A fairly good level of competency in expressing each concept in terms the student can relate, draw analogy and summarize the entire lesson. Occasional support in imparting effective training. 			
(b) Weightage in the range of 75%-90% to be allotted during assessment				
For performance in this grade, the candidate should be well versed with instructional design, implement learning programme and assess learners which	 Demonstration of <i>good</i> skill to establish a rapport with audience, presentation in orderly manner and establish as an expert in the field. 			

demonstrates attainment of a <i>reasonable standard</i> of crafts instructorship with <i>little</i> guidance and engage students by demonstrating good attributes of a trainer.	 Above average in engagement of students for learning and achievement of goals while undertaking the training on specific topic. A good level of competency in expressing each concept in terms the student can relate, draw analogy and summarize the entire lesson. Little support in imparting effective training.
(c) Weightage in the range of more than 9	 0% to be allotted during assessment Demonstration of <i>high</i> skill level to establish

4. JOB ROLE

Brief description of job roles:

Manual Training Teacher/Craft Instructor; instructs students in ITIs/Vocational Training Institutes in respective trades as per defined job role. Imparts theoretical instructions for the use of tools & equipment of related trades and related subjects. Demonstrate process and operations related to the trade in the workshop; supervises, assesses and evaluates students in their practical work. Ensures availability & proper functioning of equipment and tools in stores.

Assembler, Workshop Machines and Equipment; assembles finished mechanical components to form specific unit or machine such as lathe, grinder, milling machine, pump etc. using hand tools and machines. Studies drawing or sketch for fitting and assembly details. Places different finished metal components of machines like frames, cross members, bearings, bottom and top plates, etc. on floor and assembles them together in prescribed sequence, using nuts, bolts etc. Carries out further tooling, if necessary while assembling. Fits different parts together to form complete unit or part of unit. Checks during assembly stages for accuracy of fitting and to correspond to specifications. Finishes fitting and files off edges or ends of parts where necessary using hand files, chisels etc. Tests either finished main assembly or sub assembly parts for specified performance and makes necessary adjustment to parts using hand tools. May install assembled units at site or in factories for actual running. May repair and overhaul machines.

Erector, Machine and Equipment; installs, erects and changes layout of machines and equipments in mills, factories, workshops etc. according to instructions or specifications. Studies drawings and lay out sketches of machines or equipment to be erected. Calculates available floor area in relation to dimension of machines, working space required etc. and marks areas on floor for foundations of machines. Guides' construction of foundations and setting of foundation bolts and fixtures according to type of machines to be installed and allows foundations to dry up and settle for required number of days. Places base or holding device of machines through foundation bolts or on fixture one by one, using lifting equipment and aligns and levels them with spirit level. Fastens or secures machines tightly to foundation bolts or fixtures and rechecks alignment and leveling to ensure correctness. Makes adjustment if necessary and gets grouting of foundations done. Allows grouting to dry up and adjust position of different parts of machine for efficient operation. Gives necessary power supply to machine or connects machine to line shaft. May run machine and observe performance. May assemble, repair and overhaul machines. May specialize in erecting particular type of machine or equipment such as printing machine, lathe, pneumatic hammer, grinder, pumps, etc.

Maintenance Technician - **Mechanical;** is responsible for maintaining the mechanical systems of equipment and machinery. They use laid down procedures, and knowledge of the equipment to conduct routine maintenance and organize repairs. They are also involved in control and monitoring devices and occasionally in the manufacture of items that will help in maintenance.

Reference NCO:

- a) 2356.0100 Manual Training Teacher/Craft Instructor
- b) 8211.0100 Assembler, Workshop Machine and Equipment
- c) 8211.1000 Erector, Machine and Equipment
- d) 3115.0102 Maintenance Technician, Mechanical

5. LEARNING OUTCOME

Learning outcomes are a reflection of total competencies of a trainee and assessment will be carried out as per the assessment criteria.

5.1 TRADE TECHNOLOGY

- 1. Demonstrate workshop safety measures and maintenance of precision measuring instruments.
- 2. Evaluate components for assembly by carrying out surface finishing operations like scrapping, lapping etc. and different Heat Treatment like Hardening, tempering case hardening etc.
- 3. Monitor dismantling, repair and assembling of mechanical power transmission elements in machine tools and check for functionality.
- 4. Check preventive maintenance of lubrication & cooling system of different machines like lathe, drilling, grinding as per manufactures' guidelines.
- 5. Monitor compliance to preventive maintenance during dismantling & assembly of indexing head, tail stock, saddle etc. and test for accuracy.
- 6. Evaluate different joints made by setting up of gas & arc welding machines and using Sheet Metal Work tools.
- 7. Monitor the work of dismantling, replace and assembling of machine parts of shaping, milling, lathe and drilling machines.
- 8. Monitor the work of foundation and installation of machines and material handling process.
- 9. Monitor the work of dismantling, replace and assembling of machine parts including spindle drive mechanism, Shafts, Axles, Couplings and Clutches.
- 10. Demonstrate making of Simple Machine parts involving sliding, scraping and alignment.
- 11. Analyse circuit construction of pneumatics and hydraulics observing standard operating procedure & safety aspect.
- 12. Demonstrate basic functioning of different electrical equipment DC/ AC motors, passive & active electronic components, SCRS & ICS, proximity & ultrasonic sensors etc including basic maintenance work.
- 13. Demonstrate PLC Programme and interface with other devices to check its Applications, evaluate part programme, test on simulation software and provide solutions to different errors.
- 14. Evaluate fault to carryout maintenance work of different machineries/ equipments viz., shaper, surface grinder, lathe machines etc in the shop floor, using appropriate tools & equipment to ensure its functionality.
- 15. Demonstrate CAD software commands and operational features of CNC machine using CNC codes (G & M codes) and programming.
- 16. Monitor Overhauling, preventive maintenance and Troubleshooting of Machine tools, pumps, fans, blowers & compressors.

			satisfaction test.

Practical 48 Hrs Theory 18 Hrs	Check preventive maintenance of lubrication & cooling system of different machines like lathe, drilling, grinding as per manufactures' guidelines	 24. Demonstrate Coolant preparation, cleaning of coolant tank, filters, replacing coolant, identifies lubrication points, clean and lubricate. 25. Check the lubrication line for proper suction and delivery at end points. 	Viscosity and its measurement using various apparatus, cutting fluids and coolants, various types, composition, health hazards of coolants, grades and designation systems. Types of lubricants, colour coding such as high speed long life grease, heat resistant and water resistant grease. Centralized lubrication system - parts, functioning and mechanism.
Practical 32 Hrs Theory 12 Hrs	Monitor compliance to preventive maintenance during dismantling & assembly of indexing head, tail stock, saddle etc. and test for accuracy.	 26. Dismantle machine vice, three jaw chucks, Indexing head, tail stock, slotting attachment, coolant pumps, using various hand tools with specific reference to functional part of their machine and oiling of dismantled parts. 27. Assemble and testing for operation. 	Maintenance Activity - Maintenance Definition. Different types of maintenance. Work Procedures, job cards, Schedule, History record sheet.
Practical 48 Hrs Theory 18 Hrs	Evaluate different joints made by setting up of gas & arc welding machines and using Sheet Metal Work tools.	 28. Connect and set Arc welding plant and gas welding plant. 29. Hand on practice on Arc, gas and Spot welding. 30. Safety to be observed in welding work. 31. Demonstrate uses of hand tools in the SMW trade. 32. Development of surface from working drawing. 33. Marking out location and drilling of holes for riveting. 34. Use of dolly and snap forming river heads. 35. Lap and butt joint by cold riveting. 	ALLIED SKILL Welder (G & E) Flame cutting principle and use of equipments, safety precaution and maintenance of equipments, symbols of welding. Sheet Metal Worker (SMW) Over view of SMW, Name and description of common tools and equipments. Different type of joints employed in sheet metal work. Rivet and riveting. The object of riveting, relation between size of rivet and thickness of sheet, pitch of rivet, types, uses, method of riveting using snap and dolly Rivet joints, defects in riveting and their remedies.

Dractical 40	Monitor the work	26 Sample and studies to be	Concept of KAIZEN lust in
Practical 48 Hrs Theory 18 Hrs	Monitor the work of dismantling, replace and assembling of machine parts of shaping, milling, lathe and drilling machines.	 36. Sample case studies to be discussed based on theory. 37. Demonstrate total cleaning of machine tool after total inspection. 38. Planning of overhauling: Method of dismantling, precaution to be taken while dismantling. 39. Sequence of operations, marking of the parts, methods of cleaning of parts. 40. Proper method of removal and remounting of bearings. 41. Dismantle & Re-assemble machine-sub assemblies in correct sequence, testing of correct functioning of machines (shaping, milling, lathe and drilling machines), coolant and lubrication pumps. 42. Solvent and cleaning materials - their names and specification. Preparation of test chart. 	Concept of KAIZEN, Just-in- Time (JIT), Total Productive Maintenance (TPM) and Small Group Activity (SGA). Concept of routine, preventive and breakdown maintenance. Inspection, diagnosing & repairing procedure. Schedule and planning for preventive maintenance work. Maintenance of records, log book and history sheet. Functions involving preventive maintenance. Advantage of preventive maintenance. Frequency of preventive maintenance, preparing preventive maintenance schedule - points to be considered. Method of repairing damage parts, Major overhauling, Method of reconditioning of machine tools using -special tools, test mandrel, template- patterns, gauges, bridges. Testing of m/c after repair. Concept of test chart.
Practical 48 Hrs Theory 18 Hrs	Monitor the work of foundation and installation of machines and material handling process.	 43. Introduction to leveling of Machines. 44. Demonstrate leveling - use of spirit level, camel back, straight edge, bridge, parallel block. 45. Leveling of surface plates, Marking table. Milling machine. 46. Lathe machine - preparation of test report indicating degree of flatness. 47. Use of leveling bolts. Taper wedges for leveling of the horizontal and vertical surfaces. 48. Demonstrate foundation. 49. Demonstrate different types 	Methods employed for installation and erection of precision and heavy duty machines. Location and excavation of foundation. Different types of foundation: Structural, reinforced, wooden and isolated. Requirement of good foundation, different types of foundation & foundation bolts. Foundation for heavy duty machine and precision machine. Special process involving in erection of heavy duty machines. Layout of

			1
Practical 32	Monitor the work	 of fits following inter changeability system. Process of fitting ordinary type Brass Bearing Method of fitting ball and roller bearing on the shaft. 50. Demonstrate use of different type of lifting tackles both mechanical and hydraulics - such as screw jacks, chain pulley block, crabs and winches, rollers, bars and levers. 51. Demonstrate use of inclined plane. Hydraulic trolleys. 52. Maintenance of lifting equipments. Demonstrate method of lifting jobs of various shape, size and weight. Use of appropriate length of chains. Inspection of chain links and lifting tackles. 53. Demonstrate on the shop floor. 	machines - Consideration of power, space, weight, ventilation and moving parts. Types of vibrations, causes and prevention of vibrations. Method of insulation of machine against vibration. Anti-vibration devices and their locations. Different types of instruments used for checking the vibrations. Elements of Interchange able system its terms & application. Method of selective assembly, Hole & shaft basis of system. Different type of appliances and tackles for lifting, shifting, loading and unloading of machines and equipments. Screw jack - their use and working principles. Chain pulley block and hook - their uses and working principles. Concept of lifting, crane and hoist - working principles and main constructional features. Working principles and use of other tackles like crabs, winches, slings (wire rope & elastic), roller and bars, levers, lashing and packing. Importance of testing of lifting tackles. Use of inclined plain. Special precaution in handling heavy equipments, removal and replacement of heavy parts. Safety in transportation. Machine Alignment -
Hrs	of dismantling, replace and	replace and assembling of various spindle drive mechanism used on pedestal	different types - procedure. Equipment for aligning machines - use of test
12 Hrs	assembling of machine parts	grinder, drilling, milling, shaper, lathe and grinding	mandrel, master cylinder, straight edge, slip gauges and

	including spindle drive mechanism, Shafts, Axles, Couplings and Clutches.	 machines. 55. Checking for spindle run-out, axial and radial play. Setting of play as per standard chart. 56. Checking of bearing performance - repairs and replacement as needed. 57. Demonstrate assembling of Shafts, Axles, Couplings and Clutches used on various machines. 	dial indicators. Precaution to be observed in the use of equipments while aligning. Special precautions necessary for erection, leveling and aligning precision machines. Testing for correct functioning of machine parts and commissioning of machine. Geometrical testing of machine tools.
Practical 32 Hrs Theory 12 Hrs	Demonstrate making of Simple Machine parts involving sliding, scraping and alignment.	 58. Demonstrate Alignment - Types, alignment of axes. Different position of misalignment, alignment of reference planes, alignment of surfaces. 59. Checking straightness, flatness, parallelisms, equidistance, squareness, checking methods for rotary elements. 60. Demonstrate on exercises involving making of Simple Machine parts which have certain functional relationship to other parts such as driving mechanism, dovetail, assembling parts using bolts, dowel pin, locking devices. Precision fittings - involving sliding, scraping and alignment. 	Need of Machine Tool Testing, Advantages of testing. Acceptance Test. Geometrical check. Measuring equipments use, checking methods.
Practical 32 Hrs Theory 12 Hrs	Analyse circuit construction of pneumatics and hydraulics observing standard operating procedure & safety aspect.	 61. Application of different types of valves in Hydraulic and Pneumatics circuits. Demonstrate on machine tool application of the hydraulic drives for rotary, reciprocating, speed changing, clamping, unclamping and feed motions. 62. Setting of various hydraulic elements for proper functioning. Repairs of 	Constructional features, working principles and uses of fluid moving machineries. Non-positive and Positive displacement pumps viz. centrifugal and propeller pumps, gear pump, vane pump, piston pump. Valve: Constructional features and working principles, types viz. directional control, pressure control, flow control and non-

		 hydraulic presses and various hydraulically operated equipment, fault finding by simulation. 63. Setting of pneumatic circuit elements for proper functioning -adjusting, cushioning of the cylinders flow and pressure. 64. Practice on simple hydraulic & pneumatic circuits. 65. Maintenance of hydraulic power pack. Maintenance of air preparation unit, FRL (Filter-regulator-lubricator) unit. 	return valve. Actuators: types & constructional features and principles of hydraulic Actuator. Fluid power symbols. Hydraulic and pneumatic power source and circuits. Study of different hydraulic and pneumatic circuits. Study of hydraulic oil, air preparation system, hydraulic accessories. Types of hydraulic oils, preservation, analysis contaminations and minimization of contaminations. Performance testing of hydraulic pumps.
Practical 48	Demonstrate basic	66. Demonstrate common tools	Electrical Safety rules and
Hrs	functioning of	and testing equipments. 67. Selection and replacement of	precautions. Starters - Concept of DOL,
Theory	different electrical	switches, fuses, preventers	star-delta and auto
18 Hrs	equipment DC/ AC motors, passive &	etc.	transformer.
	active electronic	68. Testing of single & three	Concept of variable voltage -
	components, SCRS	phase supply. 69. Test and overhauling of	variable frequency drive. Basic electronics, concept of
	& ICS, proximity &	induction motor and starter.	PCB, conductors, semi
	ultrasonic sensors	70. Common faults and remedies	conductors, resistance,
	etc including basic	of motor and starter.	condenser, diodes,
	maintenance	71. Testing of components like resistors, capacitors, diodes	transistors, SCR, UJT. Different types of rectifiers,
	work.	and transistors.	regulated power supply,
		72. Verification of Logic Gates.	SMPS.
		73. Practice on Bridge rectifier	Use of a transistor as a switch
		and simple inverter circuit. 74. Measurement of voltage &	& its simple applications. Use of thyristor, diode and
		current at different test points.	IGBT (insulated gate bipolar transistor).
		75. Demonstration of PLC	Concept of power electronics,
	Demonstrate PLC	program using ladder diagram	Concept of IC, Concept of
	Programme and	and statement list.	micro processor.
	interface with other devices to		Concept of AC-DC and DC-AC converter.
	other devices to check its		CNC machine drives,
	Applications,		difference between servo
	evaluate part		motor, stepper motor - DC and AC.
			anu AC.

	programme, test on simulation software and provide solutions to different errors.		Logic gates: AND, OR, INVERTER, NAND, NOR, EX- OR etc Combination of series & parallel switches. Related application. CPU Memory - RAM, ROM, PROM, EPROM. PLC: Introduction, main components and types. PLC programming - Ladder diagram and Statement List (STL), symbols use in PLC programming, application of PLC in automation industry.
Practical 32 Hrs Theory 12 Hrs	Evaluate fault to carryout maintenance work and break down of different machineries/ equipments viz., shaper, surface grinding, drilling, lathe, milling, in the shop floor, using appropriate tools & equipments to ensure its functionality.	 76. Demonstrate various machines tools such as Lathe, Milling, Radial drilling, Grinding shaping, and slotting machine with special attention to transmission mechanism. 77. Demonstrate machine accessories, their function in operation. 78. Repairs of gear teeth by binding up and dovetail insert method. 79. Method of fixing gear, wheels for various drives. 	Gear: Types and terminology of different types of gears, worm & worm wheel and rack & pinion. Method of repairing gear teeth by binding up and dovetail insert method. Method of fixing gear, wheels for various drives. General causes of the wear and tear of the toothed wheels and their remedies.
Practical 48 Hrs Theory 18 Hrs	Demonstrate CAD software commands and operational features of CNC machine using CNC codes (G & M codes) and programming.	 80. CAD software commands and using different menu of CAD. Drafting of simple machine parts with the help of different menu. Perform on plotting. 81. Demonstrate CNC machine. Practice on operational features with reference to driving mechanism, centralized lubrication system. 82. Familiarization with coordinate system, use of CNC codes (G & M codes) and 	Concept of Auto CAD software. Elementary commands of CAD software. Details of different menu & plotting. Introduction to CNC Machines. Difference between CNC and SPM. Importance of CNC machines over other mass production processes. Concepts of architecture and Working principles of CNC Machines - Machine beds -

		programming, simulation, dry run & cutting for simple test jobs. 83. Perform basic features of CAM software.	ball screw mechanism - servo drives - feedback Mechanism. LM guides mechanism. Concept of ATC & APC. Axes designation. Introduction to G and M codes, CNC tooling and fixtures Simple manual part programming commands. Introduction to CAM software.
Practical 32 Hrs Theory 12 Hrs	Monitor Overhauling, preventive maintenance and Troubleshooting of Machine tools, pumps, fans, blowers & compressors.	84. Demonstrate Trouble shooting, fault finding and rectification of machine tools and other machines like pumps, fans, blowers & compressors. Test for operation.	Soltware.Preventive maintenance:Advantages of preventivemaintenance, Aim - BasicActivity, Planning, ScheduleBasic aspects.Periodical Inspection -Frequency- Schedule-Types ofschedule, Checklist,Preparation of Checklist.Record Maintenance-Record Register, Form,Instruction, Chart forAbbreviation, History sheet,General MaintenanceRegister.Inventory management ofsectional stores. Layout ofMaintenance Section:-FaultFinding Method.

SYLLABUS FOR CORE SKILLS

- 1. Workshop Calculation & Science(Common for all Engineering CITS trades) (80 Hrs)
- 2. Engineering Drawing (Group I) (120Hrs)
- 3. Training Methodology (Common for all CITS trades) (320Hrs + 200Hrs)

Learning outcomes, assessment criteria, syllabus and Tool List of above Core Skills subjects which is common for a group of trades, provided separately in www.bharatskills.gov.in

7. ASSESSMENT CRITERIA

	LEARNING OUTCOME	ASSESSMENT CRITERIA		
	TRADE TECHNOLOGY (TT)			
1.	Demonstrate workshop safety measures and maintenance of precision	Demonstrate tools, instruments and equipments for marking and make this available for use in a timely manner. Assess raw materials and visual inspect for defects.		
	measuring instruments.	Evaluate specification as per desired mathematical calculation and observing standard procedure.		
		Demonstrate measurement of all dimensions in accordance with standard specifications and tolerances.		
		Demonstrate Hand Tools for different fitting operations and make these available for use in a timely manner.		
		Comply with safety procedure during above operation as per standard norms and company guidelines.		
2.	Evaluate components for assembly by carrying out	Demonstrate tools & equipment required for surface finish operations like scrapping, lapping etc.		
	surface finishing operations like scrapping, lapping etc.	Evaluate heat treatment operated by maintaining appropriate temperature.		
	and different Heat Treatment like Hardening,	Demonstrate safety procedure during the heat treatment and observing standard procedure.		
	Tempering case hardening etc.	Evaluate surface finishing operation observing standard procedure.		
3.	Monitor dismantling, Repair and Assembling of mechanical power	Monitor dismantling of shaft, coupling, gears, belt, clutch, pulley, chain & sprockets, etc from the power transmission system. Demonstrate functions and constructional features of various		
	transmission elements in machine tools and check	mechanical power transmission elements and drives. Check draining out lubrication oil from the power transmission system.		
	for functionality.	Monitor selection of proper tools for the required task. Access repair / replacement of damaged parts adhering to safety aspects while working with power transmission system.		
		Monitor assembling in sequence of dismantled parts of power transmission system.		
4.	Check preventive	Monitor relevant information from manufacturing guidelines to carryout preventive maintenance.		
	maintenance of lubrication & cooling system of different machines like	Monitor preventive maintenance of lubrication and cooling system as per standard guidelines.		
	lathe, drilling, grinding as per manufactures	Access filling of lubrication oil into the system and check functionality.		

guidelines.	
 Monitor compliance to preventive maintenance during dismantling & assembly of indexing head, tail stock, saddle etc. and test for accuracy. 	Monitor relevant information to conduct preventive maintenance of lathe operation. Evaluate different tools and materials required to carry out preventive maintenance. Monitor advance lathe operation viz., taper turning, thread cutting to check for functionality and accuracy. Demonstrate dismantling and assembly of different components i.e. head stock, tail stock etc as per stand procedure. Demonstrate safety procedure while carrying out above task.
 Evaluate different joints by setting up of gas and arc welding machines and using sheet metal work tools. 	Monitor set up of gas plant & arc welding machines for welding. Evaluate set up of welding machine as per standard parameters and selection of electrode and welding torch adjustments according to the assigned task. Demonstrate operation of the welding machine and perform different welding joints, check visually for common welding defects. Evaluate the applications of different welding joints like lap and butt joints with respect to machine tool maintenance. Exhibit development of surface from working drawing with drilling and riveting as per marking out location.
 Monitor the work of dismantling, replace and assembling of machine parts of shaping, milling, lathe and drilling machines. 	Check for correct functioning of machines like shaping, milling, lathe and drilling machines. Monitor dismantling and replacing of different components with accuracy applying range of skills and standard operating procedure. Check Assembling and functionality of these different components. Comply with safety rules when performing the above operations.
8. Monitor the work of foundation and installation of machines and material handling process.	Ensure safety aspects related to the erection & installation of heavy machines during pipe/tube fittings. Check electrical power connections as per the requirement Monitor geometrical test as per standards for installed machine. Monitor component trial machining test and check the dimensional accuracy of the component. Monitor working of different material handling equipments
9. Monitor the work of dismantling, replace and assembling of machine parts including spindle drive mechanism, Shafts,	Demonstrate dismantling, replace and assembling of spindle drive mechanism used on different machines. Exhibit checking for spindle run-out, axial and radial play and Setting of play as per standard chart. Demonstrate checking of bearing performance - repairs and

Axles, Couplings and Clutches.	replacement . Demonstrate assembling of Shafts, Axles, Couplings and Clutches used on various machines
10. Demonstrate making of Simple Machine parts involving sliding, scraping and alignment.	Demonstrate making of Simple Machine parts with functional relationship to other parts such as driving mechanism, dovetail assembling involving sliding, scraping and alignment. Demonstrate checking of Alignment, alignment of axes, mark position of misalignment, alignment of surfaces. Exhibit checking of straightness, flatness, parallelisms, equidistance, squareness, checking methods for rotary elements.
	equidistance, squareness, checking methods for rotary elements.
11. Analyse circuit construction of pneumatics and hydraulics observing standard operating procedure & safety aspect.	Check construction of pneumatics & hydraulics circuit as per drawing and collect necessary information. Monitor machine tool application of the hydraulic drives for rotary, reciprocating, speed changing, clamping, unclamping and feed motions.
, , , , , , , , , , , , , , , , ,	Evaluate setting of various hydraulic elements for proper functioning. Analyse construction of circuit of pneumatics and hydraulics for proper functioning, observing standard procedure
	proper functioning, observing standard procedure. Check different parameters and functionality of the system.
	check different parameters and functionality of the system.
12. Demonstrate basic functioning of different electrical equipment DC/ AC motors, passive & active electronic components, SCRS & ICS, proximity & ultrasonic sensors etc including basic	Examine functioning of different electrical equipment, sensors and their utilization in industrial application. Demonstrate different sensors viz, proximity &ultrasonic etc. Check straightness, flatness, parallelism etc for rotary elements. Evaluate precision fittings involving sliding, scraping and alignment. Observe safety precautions during examination of electrical equipment and sensors.
maintenance work.	
13. Demonstrate PLC Programme and interface with other devices to check its Applications, evaluate part programme, test on simulation software and provide solutions to different errors.	Demonstrate a PLC Programme as per application requirement. Interface PLC with other devices observing standard procedure and safety. Testing and overhauling of induction motor and starter. Demonstrate part programme as per drawing. Demonstrate possible solution within the team. Test the part programme using simulation.
14. Evaluate fault to carryout maintenance work and break down of different	Demonstrate various machine tools like lathe, milling, radial drilling, grinding shaping etc. used during break down. Check the faults aroused in the machine tools.

machineries/ equipments	Check the repair of gear teeth by binding up and dovetail insert
viz., shaper, surface	method.
grinding, drilling, lathe,	Monitor fixing of gear, wheels for various drives.
milling, in the shop floor,	Check the break down maintenance of faulty machine.
using appropriate tools	
&equipments to ensure its	
functionality.	
15. Demonstrate CAD software	Demonstrate different CAD commands.
commands and operational	Demonstrate different components of CNC machines.
features of CNC machine	Explain job drawing in CAD software using elementary
using CNC codes (G & M	commands.
- ·	Demonstrate part programme as per drawing.
codes) and programming.	Simulate for its correctness with simulation software.
	Solve problems during simulation by selecting and applying basic
	methods, information and using quality concept.
	Check accuracy/ correctness of part program.
	Observe safety/ precaution during simulation.
16. Monitor Overhauling,	Demonstrate the safety practices related to the pumps, fans,
preventive maintenance	blowers & compressors.
and Troubleshooting& of	Demonstrate the different types of pumps, fans, blowers,
•	compressors etc and the safety practices related to it.
Machine tools, pumps,	Demonstrate trouble shoot chart for pumps, fans, blowers &
fans, blowers &	compressors and perform the task.
compressors.	Check preventive maintenance of pumps, fans, blowers and
	compressors.
	Demonstrate the industrial applications of pumps, fans, blowers
	and compressors in different machine tools.
	•

8. INFRASTRUCTURE

	LIST OF TOOLS AND EQUIPMENT FOR MMTM CITS TRADE				
	for batch of 25 candidates				
A. TRAINEES TOOL KIT					
S No.	Name of the Tool & Equipments	Specification	Quantity		
1.	Steel rule	300 mm	25+1Nos.		
2.	Inside Caliper	150 mm (spring)	25+1Nos.		
3.	Outside Caliper	150 mm. (spring)	25+1Nos.		
4.	Divider	150 mm. (spring)	25+1Nos.		
5.	Hermaphrodite caliper	150 mm.	25+1Nos.		
6.	Try Square	150 mm.	25+1Nos.		
7.	Hacksaw Frame adjustable Type.		25+1Nos.		
8.	Hammer Ball Peen	200gm.with handle.	25+1Nos.		
9.	Hammer Ball Peen	400.with handle.	25+1Nos.		
10.	Cold Chisel	20x200 mm	25+1Nos.		
11.	Cross cut Chisel	10x150 mm.	25+1Nos.		
12.	Half round Chisel	10x150 mm.	25+1Nos.		
13.	Diamond point Chisel	10x150 mm.	25+1Nos.		
14.	Centre Punch	100mm.	25+1Nos.		
15.	Prick Punch	100mm.	25+1Nos.		
16.	File Flat Bastard	300mm.	25+1Nos.		
17.	File Flat	2 nd cut 250 mm	25+1Nos.		
18.	File Flat Bastard	350mm.	25+1Nos.		
19.	File Flat smooth	200mm.	25+1Nos.		
20.	Round Nose Pliers	200mm.	25+1Nos.		
21.	Combination Pliers	200mm.	25+1Nos.		
22.	File half Round	2 nd cut 250mm.	25+1Nos.		
23.	File Three sq. Smooth.	200mm	25+1Nos.		
24.	File Round Smooth.	200mm	25+1Nos.		
25.	File Square Smooth.	200mm	25+1Nos.		
26.	File Needle Set of	12 nos.	25+1Nos.		
27.	Scraper A	250mm. (Flat)	25+1Nos.		
28.	Scraper B	250 mm (Triangular)	25+1Nos.		
29.	Scraper D	250 mm (Half Round)	25+1Nos.		
30.	Spindle Blade Screw Driver	100mm	25+1Nos.		
31.	Screw Driver	200 mm.	25+1Nos.		
32.	Allen Hexagonal keys	2 to 16 mm.	25+1Nos.		
33.	File Card		25+1Nos.		
34.	Scriber	150x3 mm.(one side offset)	25+1Nos.		
35.	Offset Screw Driver	,	25+1Nos.		
36.	Screw Driver	300 mm heavy duty	25+1Nos.		

B. II	NSTRUMENT AND GENERAL SHOP OUTFIT		
37.	Vernier height Gauge	0-300mm, Accuracy 0.02mm.	2 Nos.
38.	Vernier Bevel Protractor	150 mm blade, L.C=5 (5 min)	4 Nos.
39.	Vernier Caliper	200mm (0-200mm), L.C=0.02mm.	8 Nos.
40.	Digital Caliper	200mm (0-200mm)	2 Nos.
41.	Dial Caliper	200mm (0-200mm), L.C=0.02mm, 2mm/Rev.	2 Nos.
42.	Outside Micrometer and Outside Vernier Micrometer	0 to 25 mm. L.C=0.01mm L.C.=0.001mm	Each 2 Nos.
43.	Outside Micrometer and Outside Vernier Micrometer	25 to 50mm. L.C=0.01mm L.C.=0.001mm	Each 2 Nos.
44.	Outside Micrometer & Outside Vernier Micrometer	50 to 75 mm. L.C=0.01mm L.C.=0.001mm	Each 1 No.
45.	Outside Micrometer & Outside Vernier Micrometer	75 to100 mm. L.C=0.01mm L.C.=0.001mm	Each 1 No.
46.	Combination Set	300 mm	8 Nos.
47.	Sine Bar.	200 mm	2 Nos.
48.	Slip gauge	Tungsten carbide, Grade I 112 nos	1 Set
49.	Internal Micrometer	12 to 20 mm. (3 point)	2 Nos.
50.	Gear Tooth Vernier Caliper (Metric)		1 No.
51.	Bevel Gauge	200	1 No.
52.	Plunger Dial Gauge 0-10mm L.C=0.01mm with magnetic stand		2 Nos.
53.	Plunger Dial Gauge	0-1 mm L.C=0.001mm with magnetic stand.	2 Nos.
54.	Feeler Gauge	(0.05mm to 1.0mm)-No. of leaves =20	3 Sets.
55.	Radius Gauge up to	7.0mm & 1. 0 to 7mm., 7.5mm to 15mm.	2 sets each.
56.	Screw pitch gauge for metric pitches	0.35 to 6mm	1 No.
57.	Centre gauge	60 Deg.	1 No.
58.	Plug Gauge Plain	(5 to 25 by 2.5mm)(Go & No Go)	1 No.
59.	Ring gauge Morse	Taper No. 1,2,3,4	1 Set
60.	Drill sleeves Morse	Taper 1-2, 2-3, 3-4, 4-5	1 Set
61.	Ring Gauge	5 to 25 by 2.5 mm.(Go & No Go)	1 Set
62.	Standard Wire Gauge (swg)		1 No.
63.	Dial Bore Gauge to	(20-25mm)	2 Nos.

		L.C.=0.01mm	
64.	Straight Edge	485mm to 1445mm.	1 Set
C. GE	NERAL SHOP OUTFIT: 1. TOOLS & INSTRUMENTS F	OR MAINTENANCE SHOP	
65.	Master Flat-scraping test bar in cross section all sizes	600mm length, 75 x 75 mm sq. scraped to an accuracy of 0.02 mm. per 300mm. seasoned.	1 No.
66.	Tap and die set with necessary tap wrench and die holder	M6 to M12	1 Set
67.	Spanner Socket	set of 25 pieces (10 to 25, 27, 30, 32mm =18 pcs. and accessories =7 Nos.)	1 Set
68.	Hammer Soft	faced 30 mm dia. Plastic tipped	4 Nos.
69.	Pipe Wrench	450 mm .	2 Nos.
70.	Chain Pipe Wrench	650 mm.	1 No.
71.	Self alignment Roller ball bearing		1 No.
72.	Telescopic gauges	13 mm to 300 mm	1 Set
73.	Lubricant trolley	2400x200x1200mm (8 chamber)	1 No.
74.	Collapsible tool Kit	5 compartments	1 No.
75.	Tap Extractor		2 Nos.
76.	Linear Actuator (single & double acting Cylinder)		1 Each
77.	Vibrometer		1 No.
78.	Machine tool calibrator		1 No.
79.	Lathe tool Dynamometer		1 No.
80.	Stud Extractor.		2 Nos.
81.	Magnifying glass	75 mm.	2 Nos.
82.	Pin spanner set.		1 Set
83.	Hand keyway broacher		1 No.
84.	C.I. Surface plate with wooden stand and cover	400x400 mm	1 No.
85.	Head lamp		2 Nos.
86.	Pneumatic scraper with adjustable stroke		2 Nos.
87.	Hydraulic wheel and bearing puller		1 No.
88.	Master test Bar (Different sizes)		1 Set
89.	Spirit level	150 mm	2 Nos.
90.	Gasket Hollow Punches	5, 6, 8, 10, 12, 19, 25 mm. dia	1 Each
91.	Bar Type Torque Wrench up to	14 kg f-m.	1 No.
92.	Cam Lock Type Screw Driver		1 No.
93.	Flaring Tool		1 No.
94.	Tube Expander up to 62 mm.		1 Set
95.	Circlip Pliers	150mm (inside and outside, straight & Bend)	2 Each

	SRDG Ball Bearing, DRDG Ball Bearing, Self aligning Ball Bearing, SRAC Ball Bearing,		1 Each
96.	Needle Bearing, Single Row Cylindrical Roller		
	Bearing, Tapered Roller Bearing, Plain Bush		
	Bearing, Thin walled Bearing.		
97.	Viscometer (Red Wood)		1 No.
98.	Adjustable spanner	12"	2 Nos.
99.	Adjustable spanner	8"	2 Nos.
100.	Adjustable spanner	6''	2 Nos.
101.	Screw driver medium duty	10"	4 Nos.
102.	Screw driver light		4 Nos.
400	Master Bar 45 Degree, scraping Bar., all sides to	600 x 75 x 25 mm	1 No.
103.	an accuracy of	0.02 mm seasoned.	
104.	Vane pump fixed and variable delivery		1 each
105.	Hydro motor		1 No.
106.	Accumulator (gas)		1 No.
107.	Pneumatic tools (Portable nut spanner		1 each
107.	/Runner, chisel, grinder sander and hammer)		
108.	Hydraulic trainer with necessary aggregates for different machine circuit.		1 set
100	Pneumatic trainer with necessary aggregates for		1 set
109.	different machine circuit.		
	Hydraulic valves (Relief, Sequence, Unloading,		1 each
110.	Pressure-reducing, Check, flow control,		
	Directional Control Valves etc).		
111.	Transparent Hydraulic cylinder		1 No.
112.	Cut model of pneumatic valve		1 No.
113.	Flow detector (Magnetic crack detector)		1 No.
114.	Engineering Stethoscope		1 No.
115.	Tool picker collets type		1 No.
116.	Tool picker magnetic type		1 No.
117.	Granite surface plate with stand and cover	1600X1000	1 No.
118.	Bearing and gear tester		1 each.
119.	Pneumatic scraper with adjustable stroke		2 Nos.
120.	Torch (3Cells)		2 Nos.
121.	Sledge Hammer	5 kgs.	1 No.
122.	Straight edge(steel)	1000 mm.	1 No.
C. GE	NERAL SHOP OUTFIT: 2. Machine Tools		
123.	Cylindrical Milling Cutter	90X63X27	1 No.
124.	Side and Face Milling Cutter	10X 1000X 27	1 No.
125.	Side and Face Cutter	160 X 12X 27	1 No.
126.	Slot Milling Cutter	100 X 10 X 6 X 27	1 No.
127.	Equal angular Cutter	80 X 16 X 27 in 45 deg.	1 No.
128.	Equal angular Cutter	80 X 20 X 27 in 60 deg .	1 No.
129.	Single angle Cutter	63X18X 27 X 45 dg.(LH) and (RH)	1 Each

130.	Single Angle Cutter	63X18X27X60 deg. (LH) and (RH)	1 Each
131.	End mill cutter	3,4,5,6,8,12, 16, 18, 22 mm. parallel shank.	1 Set
132.	Slitting Saw	80X3X27 MIN	1 No.
133.	Slitting Saw	100X4X27 MIN	1 No.
134.	T-Slot Cutter to suit T headed bolt of	10,12 mm S.S	1 Each
135.	Convex Milling Cutter	4,10,20 circle radius	1 Each
136.	Concave Milling Cutter	4,10,20 circle radius	1 Each
137.	Corner rounding milling cutter	2.5,4,10,16 circle radius	1 Each
138.	Woodruff key seating	cutter A 13.5X3,A 16X4,A 19.5X5,A 19.5X6	1 Each
139.	Milling gear Cutter (In volute)	1,2,3,5-3 module of 8 cutter	1 Set each
140.	Fly Cutter Holder		1 No.
141.	Engineers Parallel		1 Set
142.	Scribing block universal.	300mm	4 Nos.
143.	V-Block	100/7-80-A	1 Pair
	Table Chuck	3 Jaw with tightening	1 No.
144.		arrangement and	
		graduated in degrees.	
145.	Machine Vice	200mm Swivel Base	1 No.
146.	Machine Vice	Swivel Base 160 mm.	1 No.
147.	Angle plate size.	4 with slots	1 No.
148.	Angle plate adjustable.	250X150X175 mm	1 No.
149.	Twist drill	3 to 13mm. (SS)	1 Set
150.	Twist drill	13 to 25mm by 1mm step. (TS)	1 Set
151.	Grinding wheel dresser	(Diamond) 1.5 carret.	1 Set
152.	"C" clamp	150mm. and 200mm.	1 Pair each
153.	Hand reamer	6to 25 mm. by 1mm.	1 Set
154.	Engraving / Etching machine		1 No
155.	Mandrel	120 mm. long different sizes.	1 No.
156.	Wheel balancing stand	with its accessories.	1 Set
157.	Prick punch	3 to 10 mm by 1 mm step.	1 Set
158.	Deep cutting hacksaw frame	300mm.	4 Nos.
159.	Machine reamer	6to 25 mm. by 1 mm step.	1 Set
C. GE	NERAL SHOP OUTFIT: 3. Lathe Tools		
160.	Drill Chuck	13 mm.	1 No.
161.	Reduction Sleeve and Extension Sockets	0-1, 1-2, 2-3, 3-4, 4-5	1 Each
162.	Centre Drill	1-5	1 Set
163.	Revolving Centres with Arbor		2 Nos.
164.	Knurling Tool with holder (straight, & diamond)		1 Set each.

165.	Lathe Carriers	up to 7 mm (10 to 75mm)	1 Set
166.	Oil Stone (consumable)	, 150X50X25 mm.	4 Nos.
167.	Oil can	250 ml.	2 Nos.
168.	Hand grease gun		2 Nos.
	Boring Tool Holder	Armstrong L.H 8 and 10	2 each.
169.		sq. Bit Size X Length 200mm.	
170.	Tool Holder	8 and 10 sq. bit 2 straight	2 Nos.
D. GE	NERAL MACHINERY SHOP OUTFIT		
171.	SS and SC centre lathe (all geared)	with minimum specification as: centre height 150 mm and centre distance 1000 mm along with 4 jaw chuck, auto feed system, safety guard, motorized coolant system and lighting arrangement.	2 Nos.
172.	Universal Milling machine with minimum specification as: having motorized up &down movement along with auto feed arrangement and with following attachments such as: a. Vertical head b. Slotting attachment c. Rack cutting attachment d. Rotary table e. Dividing head f. Adaptors, arbors and collects etc. for holding straight shank drills and cutters from 3 mm to 25 mm.	Table Length x width 1200 x 300 mm	1 No.
173.	Surface Grinding Machine Wheel dia reciprocating table longitudinal table traverse full motorized supplied with magnet chuck and necessary accessories.	180 mm. 200mm 250 x 120mm	1 No.
174.	Grinding machine hydraulic external cylindrical, universal type with internal grinding attachment fully motorized and standard accessories. Centre height - Distance between centers- Least in-feed - Accessories:	150mm 800 mm 0.0025 mm 3 jaw self-centering chuck, 4-jaw independent chuck, tailstock.	1 No.
175.	Pillar Drilling Machine:	20 mm capacity with drill chuck & key.	1 No.

ANNEXURE- I

The DGT sincerely acknowledges contributions of the Industries, State Directorates, Trade Experts, Domain Experts and all others who contributed in revising the curriculum. Special acknowledgement is extended by DGT to the expert members who had contributed immensely in this curriculum.

List of Expert members participated for finalizing the course curricula of MMTM-CITS.
